Sample Commerce

August 2026

14,268	0.3%	8	3
Recorded executions	Execution failure rate	Monitored workflows	Connected instances
6	4 min	12 min	129.6 h
Recorded incidents	Median acknowledgement	Instance-unreachable time	Estimated time saved

Workflow activity

Recorded activity in this reporting month

WORKFLOW	EXECUTIONS	ERRORS	EST. TIME SAVED
Order routing	4,800	8	-
CRM contact sync	3,600	12	-
Inventory sync	2,400	10	-
Invoice delivery	1,800	6	59 h 48 min
Lead qualification	720	4	35 h 48 min
Fulfilment updates	600	2	9 h 58 min
Daily finance report	248	0	20 h 40 min
Renewal reminders	100	0	3 h 20 min

How to read this report

Time saved is an estimate: successful executions in this month multiplied by the currently configured minutes saved per run. It is not measured labour savings or verified ROI. A dash means no estimated savings were recorded.

Instance-unreachable time sums recorded outage minutes per instance. Simultaneous outages on different instances both count; this is not an uptime percentage or an SLA measurement.

Acknowledgement time covers 6 of 6 recorded incidents; it is not resolution time. Figures reflect available monitoring records, not unobserved activity.

Workflow and instance counts reflect the current configuration, not a historical month-end snapshot.
